

# H-CYBER PEOPLE

(CYBER SECURITY AWARENESS SERVICE)

CYBER EFFECT - LEVEL 0 - UNPREPARED

## SERVICE DESCRIPTION

Cyber Security Awareness Service:

» Support customers to understand how much their end users know about the cyber security threats; their networks face and the risks they introduce. End users are considered the weakest link and the primary vulnerability within a network. Organizations allocate funding to protect their networks from outside threats and reduce vulnerabilities.

Being that end users are a major vulnerability, technical means to improve security are not enough: organizations must also provide training for a personal awareness of cyber security, educate employees on current threats and how to avoid them.

» People play a vital role in Cybersecurity. There are no Processes or Technology able to resist a Human Error. Therefore, raising awareness is vital to increase Security but it is required to involve people. The goal of the Cybersecurity Awareness Service is to involve all People and educate them to change habits and endorse Security as an attitude.

» Risk Communication and Education. Educate all relevant stakeholders to understand the risk associated with using the CIS for the objectives currently being undertaken.

## VALUE PROPOSITION

Support to Cyber Security – Inform. This service enables improved cooperation between Cyber security entities, better representation of cyber security domain and improved representation of Cyber security requirements and priorities. Risk Communication and Education educates relevant stakeholders to understand the risk associated with using the CIS for the objectives currently being undertaken.

## SERVICE FEATURES

---

This service is comprised of the following features:

- ▶ **The human element**, the most efficient way to educate customer employees on how to fortify the human element of your company's security is through cybersecurity awareness training. For remote workers in particular, phishing, social engineering, compromised passwords and weak network security can expose your business to attackers.
- ▶ **On-demand training**, cybersecurity training is typically done on demand, as an online program, so that it can be completed at the learner's own pace, taken anywhere, and repeated as often as necessary. Since nobody learns when they are bored, training that engages the learner is key to actually changing user behavior.
- ▶ **Completed periodically**, to keep employees fresh on how to protect themselves online, and make them aware of new, emerging threats and attack techniques, it is recommended that training be completed at periodically. Many business compliance or insurance requirements also mandate periodical training.
- ▶ **Risk Communication and Education**: Educate all relevant stakeholders to understand the risk associated with using the CIS for the objectives currently being undertaken.

## ADDED VALUE OF OUR SERVICE

---

- » Easy to setup. Start the first training in just few minutes with Hardsecure cloud-based security awareness training solution.
- » Engaging. We do Cybersecurity Awareness training without be boring, we made it fun and engaging.
- » Customized Cybersecurity awareness (layouts, videos, contents and technical attacks) in accordance with type of business that our customers do.

# H-CYBER PEOPLE

(CYBER SECURITY AWARENESS SERVICE)

CYBER EFFECT - LEVEL 0 - UNPREPARED

» Our cybersecurity training help to save your money, since it helps you reduce the number of breaches that need to be remediated, the amount of downtime and man-hours spent on post-infection recovery, and even the number of ransoms that the customer must pay hackers to get ransomed data back.
